CCSI C200 Introduction to Computers and Programming

Fall 2017 Grade Report

Gary Baker

Computer Science
School of Informatics, Computing, and Engineering

Indiana University, Bloomington, IN, USA

December 5, 2017

Assignment 1

September 2, 2017

Problem 1

windchill.py

Good job!

Score: 50/50

Problem 2

taxes.py

Good job!

Score: 50/50

Problem 3

donate.py

Good job! Extra credit completed +25

Score: 75/50

Total Score: 175/150

Assignment 2

September 20, 2017

Problem 1

distance.py

-2 parameter speed named incorrectly

Score: 48/50

Problem 2

temperature.py

-2 conversion using the wrong parameter name, should be temperature

Score: 48/50

Problem 3

loops.py

Loops minimally changed. (25/25).
Sum square loop works correctly (25/25).
Donation conditional works (25/25).
Good work!!!

Score: 75/75

Problem 4

kitty.py

good work!

Score: 25/25

Problem 5

coolline.py

Nice job! Extra credit not attempted.

Score: 25/25

Total Score: 221/225

Assignment 3

September 27, 2017

Problem 1

maxLoops.py

-2 file should be called maxLoops.py -4 function names should be maxFor, maxWhile and maxRec +33 extra credit

Score: 97/70

Problem 2

stoplight.py

Function *rate* and *DWtime* are implemented correctly (25/25, 25/25)
Function y and N were not called by the correct name (N needed to have n0 not n) (-5 each). (20/25, 20/25)

Score: 90/100

Total Score: 187/170

Assignment 4

February 15, 2017

Problem 1

language.py

-10 project should be called Assignment4 -2 getVerb should return "" if ther word isn't found in the list

Score: 63/75

Problem 2

population.py

Function should return an integer value.

Score: 47/50

Problem 3

mathFunctions.py

Good work!!!

Score: 135/135

Total Score: 245/260

Assignment 5

February 22, 2017

Problem 1

algs.py

-4 stringIntersection should retrun exactly same number of times that a character is repeated in both the strings. For example, it returns cDD35 instead of cD35(single D) for input "abcDd325", "5tDEDc3" -2 increse returns [] when the input is a list with single element i.e [1] or [5]

Score: 114/120

Problem 2

correlation.py

Good Work!

Score: 60/60

Problem 3

fib.py

Great job!

Score: 50/50

Problem 4

floppyBox.py

Score: 30/30

Total Score: 254/260
